Pierre Carlo J. Ramos

Unity Gameplay & UI Programmer

Metro Manila, Philippines (Remote) · pierrecarloramos.j@gmail.com
pierreramos.github.io · github.com/PierreRamos · linkedin.com/in/pierrecarloramos · pierrymarbles.itch.io

SUMMARY

Unity programmer with three years at a US game studio, credited on two shipped titles and building for PC, PlayStation, Xbox and mobile. A generalist across gameplay, UI/UX, animation and save systems, currently focused on UI. Also produces pixel art and 2D assets, so I can take a feature from code to finished visuals.

EXPERIENCE

Unity Programmer · Mega Cat Studios Nov 2023 – Present

Remote contractor for a US studio

- Credited on *God of War: Sons of Sparta* and *Backyard Baseball (2026)*.
- Built gameplay systems, UI/UX, animation and back-end systems across multiple projects for PC, PlayStation, Xbox and mobile.
- Contributed to save/load, porting, optimization and internal tooling across Unity versions up to Unity 6.
- Worked daily with designers, artists, producers and QA, and stepped into non-programming roles when the team needed coverage.

Business Intelligence Intern · Solutions Exchange, Inc. Feb 2023 – May 2023

- Built BI dashboards and data visualizations in Looker Studio.

PROJECTS

Reprise Unity · C# · WebGL

- Solo action game in development bringing Sekiro-style counter combat to gunplay. ScriptableObject event architecture and data-driven enemy combos with a timed counter window. All code and pixel art by me.

Pixel Punch Unity · C#

- Solo 2D brawler in the style of *One Finger Death Punch*, back in development. Difficulty-driven enemy spawning with object pooling, and elite enemies broken through node-based minigames. All code and art by me.

Smoothie Splash: Fruit Merger · GMTK Game Jam 2023 Unity · WebGL

- Jam game on the theme "Roles Reversed": Fruit Ninja flipped, where players catch and merge fruit instead of slicing it. Built the game and most of its assets, with a partner contributing additional art.

Undergraduate Thesis: MCTS for Dynamic Difficulty Adjustment 2022 · Unity · Defended

- *Blitzkrieg*, a 2D arcade shooter (team of 4) whose AI director uses Monte Carlo Tree Search to pick each section's enemy mix from the player's performance. Built the enemy AI, most player mechanics, level design and all animation. 59.3% of 54 testers preferred it over scripted difficulty.

SKILLS

Programming	C# (advanced), Java, JavaScript, HTML/CSS
Unity	Gameplay systems, UI (uGUI, UI Toolkit), animation and physics, save systems, Addressables, editor tooling, profiling
Platforms	PC, PlayStation, Xbox, mobile, WebGL
Workflow	Git (branching workflows), Jira, Mantis Bug Tracker, VS Code
Art	Pixel art, 2D illustration, UI art · Aseprite, Paint Tool SAI 2, Clip Studio Paint

EDUCATION

BS Computer Science, Major in Game Development · University of Santo Tomas 2019 – 2023

- Dean's Lister, 2020 – 2023
